Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-30, 92-105, 107-139, 143-146 and 149-158, drawn to non-naturally occurring, biologically active compound having the formula F-A.

Group II, claim(s) 31-32, drawn to a non-naturally occurring, biologically active compound of the formula R-O-Z.

Group III, claim(s) 33-35, drawn to a non-naturally occurring, biologically active compound which comprises a Pet unit.

Group IV, claim(s) 36-42, drawn to a non-naturally occurring, biologically active compound defined by the general formula F-AF.

Group V, claim(s) 43-50, drawn to a non-naturally occurring, biologically active series A compound having formula F-1F.

Group VI, claim(s) 52-65, drawn to a non-naturally occurring, biologically active compound having formula F-4B.

Group VII, claim(s) 66-74, drawn to a non-naturally occurring, biologically active compound having formula F-8C.

Group VIII, claim(s) 75-83, drawn to a non-naturally occurring, biologically active compound having formula F-10D.

Group IX, claim(s) 84-91, drawn to a non-naturally occurring, biologically active compound having formula F-12E.

Group X, claim(s) 140, drawn to a galactosyl donor.

Group XI, claim(s) 141-142, drawn to a process of making GalCer.

The inventions listed as Groups I-X do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The inventions of

Art Unit: 1623

groups I-X are directed to structurally distinct compounds. The invention of Group X! is directed to a process for preparing a compound which is structurally distinct from the compounds encompassed by Groups i-X.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The compound of claim 50.

The compound of claim 51.

The compounds of claim 63-65.

The compound of claim 158

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

50, 51, 63-65 and 158

The following claim(s) are generic: 1-49, 52-62, 66-105, 107-146 and 148-157.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species encompass structurally distinct compounds.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
